DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, are drawn to a decoder of digital media, classified in class 713, subclass 193.
 - II. Claims 4-8, are drawn to a decoder of digital media using an encrypted contents key, classified in class 380, subclass 280.
 - III. Claims 9-13 and 21, are drawn to a key database that gives privileged access to a decoding key, classified in class 707, subclass 9.
 - IV. Claims 14--20, 22 and 31, are drawn to embedding a watermark in digital media for authentication, classified in class 713, subclass 176.
 - V. Claims 23-30 and 32-36, are drawn to digital media playback using embedded real-time information, classified in class 345, subclass 756.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a decoder for playback of digital media that does not require watermarking or an encrypted key for authorization. Invention II has separate utility such as an apparatus for decoding digital media using a key-encrypting-key that does not require watermarking. Invention III has separate utility such as an apparatus for protection of

keys used for encryption and decryption that does not require decoding of digital media. Invention IV has separate utility such as an apparatus for decoding digital media that requires authentication through a watermark pattern. Finally, Invention V has separate utility such as an apparatus that plays back digital media with real time and position measuring that does not require a decoder key or contents key for basic functionality of the apparatus. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
